Education

2018–2022	Ph.D. in Geophysics , University of Houston, Houston, USA
2015–2018	M.S. in Geology , Northwest University, Xi'an, China
2011–2015	B.S. in Geophysics , China University of Geosciences, Beijing, China

Professional Appointments

01/2025– 01/2027	Postdoctoral Research Fellow in MDRU , University of British Columbia. Research directions: orebody knowledge, mining informatics, geometallurgy
01/2023– 01/2025	Postdoctoral Research Fellow in Mineral-X , Stanford University. Research directions: geostatistics, uncertainty quantification, critical mineral exploration

Research Interests

- **Detect, characterize, and monitor subsurface natural resources**
 - Critical minerals, freshwater, hydrocarbon, and geothermal energy
 - Subsurface model construction using multiple geoscientific observations (e.g., geophysics, geochemistry, geology, rock physics, etc)
- **Decision-driven Earth Sciences**
 - Bayes' theorem and uncertainty quantification
 - Data assimilation and data fusion
 - Decision theory, reinforcement learning, and AI

Professional Service & Outreach

Editorial service

2024–present	Guest Associate Editor for GEOSCIENCES special section: Geophysical Inversion
2023–present	Guest Associate Editor for GEOPHYSICS special section: Frontiers in Electromagnetic Geophysics

Peer-reviewer

2024–present	Ore Geology Reviews
2024–present	Surveys in Geophysics
2024–present	Near Surface Geophysics
2023–present	Geophysical Prospecting
2023–present	Solid Earth
2022–present	Geocarto International
2021–present	SEG Conference Proceeding
2021–present	Geophysics
2021–present	Geophysical Journal International
2021–present	IEEE Transactions on Geoscience and Remote Sensing
2021–present	Acta Geophysica

Conference organizations

2024–present	Key Technical Contact of SEG Mining & Mineral Exploration (MME) Committee
2023–2025	Society of Exploration Geophysicists (SEG) Research Committee Early-career (RCEC) subcommittee
2024	Session Chair for GM P2: Applications in Processing and Interpretation at IMAGE Annual Meeting, Houston, Texas, USA
2024	Session Chair for EM P2: Inversion at IMAGE Annual Meeting, Houston, Texas, USA
2023	Session Co-convener: Advancing Mineral Exploration and Responsible Mining for Energy Transitions, AGU, San Francisco, California, USA
2023	Session Chair for MME 1: Mineral Exploration: Geophysics 1 at IMAGE Annual Meeting, Houston, Texas, USA
2022	Session Chair for GM 1: Inversion Insights at IMAGE Annual Meeting, Houston, Texas, USA
2021	Session Chair for MG P1: New Methods and Case Histories 1 at IMAGE Annual Meeting (SEG and AAPG joint annual conference), Denver, Colorado, USA

Affiliations

2024–Present	Geoscience and Remote Sensing Society (GRSS)
2024–Present	Institute of Electrical and Electronics Engineers (IEEE)
2022–Present	European Geosciences Union (EGU)
2021–Present	Geophysical Society of Houston (GSH)

2020–Present	American Geophysical Union (AGU), European Association of Geoscientists & Engineers (EAGE)
2018–Present	Society of Exploration Geophysicists (SEG)

Invited Talks

09/2024	Wei, X. , AI and ML for mineral exploration discussion panel. Houston, USA. <i>IMAGE Near Surface Geophysics Technical Sessions</i> .
09/2024	Wei, X. , Yin, Z. and Caers, J., A New Role for Geophysics in Mineral Exploration: Falsification of Geological Hypotheses. Houston, USA. <i>IMAGE Post-Convention Workshop</i> .
09/2024	Wei, X. , Building on Dr. Talwani’s foundations: New directions in 3D geophysical geometry inversion techniques. Houston, USA. <i>IMAGE Post-Convention Workshop W11: Manik Talwani Memorial Workshop</i> .
09/2023	Wei, X. , Yin, Z., Scheidt, C., Darnell, K., Wang, L. and Caers, J., Uncertainty quantification of the stratigraphic model conditioned on airborne geophysics, geochemistry, and drillholes. Houston, USA. <i>IMAGE Post-Convention Workshop W7</i> .
07/2023	Sun, J., and Wei, X. , Building probabilistic quasi-geology models and mapping mineral resources using joint inversion and geology differentiation. Berlin, Germany. doi: 10.57757/IUGG23-4333 . <i>IUGG</i> .
09/2022	Wei, X. , Sun, J. and Sen, M., A Bayesian framework for uncertainty quantification of salt body shapes using gravity data. Houston, USA. <i>Geophysical Society of Houston</i> .
11/2021	Wei, X. and Sun, J., Build probabilistic quasi-geology models based on multiple airborne geophysical data and sparse joint inversions. Online. <i>Geophysical Society of Houston</i> .
09/2021	Wei, X. and Sun, J., From deterministic to probabilistic geoscience modeling: analyzing uncertainties of geophysical inversions and constructing probabilistic subsurface models conditioned on petrophysical measurements. Online. <i>SimPEG monthly seminar</i> .

Awards & Honors

2022	Dan E. Wells Outstanding Dissertation Award, University of Houston (link)
2022	The Innovation Prize in Frank Arnott - Next Generation Explorers Award (\$3,000 CAD)
2022	SEG Lucien LaCoste Scholarship (\$5,305.12)
2022	Outstanding Graduate Work in Geophysics, University of Houston (\$1,250)
2022	The Best Paper in the Mining Sessions at 2021 IMAGE Annual Meeting, Denver, USA (co-author)

2022	The Best Student Paper in the Mining Sessions at 2021 IMAGE Annual Meeting, Denver, USA
2021	Student Travel Award, University of Houston, Houston
2021	SEG Technical Program Registration Grant
2021	SEG John R. Butler Jr. Scholarship (\$510.86)
2021	The Best Poster in the Mining Sessions at 2020 SEG Annual Meeting, Online
2020–2021	Student Research Funding Program (independent of advisor) from EAS Department at University of Houston
2020–2021	Outstanding Academic Achievement, University of Houston (\$700×2)
2016–2018	The First Prize Scholarship, Northwest University, Xi'an, China (×3)
2015	The Best Bachelor Thesis, China University of Geosciences, Beijing, China
2013	The Second Prize Scholarship, China University of Geosciences, Beijing, China

Grants

I am not eligible to apply for external funding as a Principal Investigator. Below, I summarize the projects I have participated in and the internal student funding I have received at University of Houston.

- **Project 1: Researcher**

- Funding source: Natural Sciences and Engineering Research Council of Canada (NSERC)
- Project title: Determining the full value of ore body knowledge in Mineral Exploration and Mining
- PI: Shaun Barker
- Co-PI: Cassady Harraden
- Duration: 01/2025-12/2027
- Total value: 498,840.19 GBP
- Role: Working on this project as a postdoc researcher at University of British Columbia

- **Project 2: Project Leader**

- Funding source: Rio Tinto and KoBold Metals (industry sponsors)
- Project title: Geophysical hypotheses falsification and Cu-Ni exploration in Crystal Lake, Canada
- PI: Jef Caers
- Duration: 06/2023-12/2024
- Total value: 156,996.00 GBP
- Role: Leading this project as a postdoc researcher at Stanford University

- **Project 3: Project Leader**

- Funding source: KoBold Metals (industry sponsor)
- Project title: Building prior models for sediments host Cu-Co deposits in Zambia
- PI: Jef Caers
- Duration: 01/2023-08/2023
- Total value: 78,487.08 GBP
- Role: Leading this project as a postdoc researcher at Stanford University

• **Project 4: Researcher**

- Funding source: National Science Foundation (NSF)
- Project title: Geophysical clues about oceanic plateau formation from magnetic anomalies and machine learning
- PI: Jiajia Sun
- Co-PI: Will Sager
- Duration: 07/2022-06/2025
- Total value: 306,563.98 GBP
- Role: Generate linear magnetic anomaly maps and train deep learning neural networks

• **Project 5: Researcher**

- Funding source: UH High Priority Area Research Equipment Grant - Large
- Project title: Protecting Texas' groundwater resources with drone geophysics
- PI: Jiajia Sun
- Co-PI: Will Sager
- Duration: 04/2021-10/2022
- Total value: 133,433.00 GBP
- Role: Set up a drone-based geophysics platform, fly the drone, and acquire airborne electromagnetic data

• **Project 6: Researcher**

- Funding source: Department of Energy (DOE)
- Project title: Deep learning enhanced joint inversion for high-resolution CO2 plume monitoring
- PI: Yueqin Huang
- Co-PI: Xuqing Wu, Jiefu Chen
- Duration: 06/2021-06/2021
- Total value: 157,035.00 GBP
- Role: Generate training models, conduct 3D inversion and joint inversions in regional scale

• **Project 7: Principal Investigator**

- Funding source: EAS Department at University of Houston
- Project title: Uncertainty Analysis of Geophysical Inversions Conditioned on Spatial Distributions of Geologic Units

- PI: Xiaolong Wei
- Duration: 03/2020-12/2020
- Total value: 784.80 GBP
- Role: Draft proposal, lead research project

- **Project 8: Named Researcher**

- Funding source: Braskem (industry sponsor)
- Project title: Independent review of Brazilian seismic activity and subsidence – Phase 2
- PI: Robert Stewart
- Co-PI: Aibing Li, Shuhab Khan, Jiajia Sun, Alan Rossiter
- Duration: 12/2019-09/2020
- Total value: 494,770.50 GBP
- Role: run 3D inversion of gravity data collected in Maceió, Alagoas, Brazil, which is the study area of the project.

- **Project 9: Named Researcher**

- Funding source: De Beers Canada
- Project title: 3D geology differentiation based on integrative modeling of airborne gravity gradiometry, magnetic and frequency-domain EM data
- PI: Jiajia Sun
- Duration: 10/2019-08/2020
- Total value: 54,964.70 GBP
- Role: Draft proposal and lead this project

Teaching Experience

- **GEOL7330: Potential Field Methods of Geophysical Exploration**

- University of Houston
- Course level: Graduate core course
- Class size: 25+
- Role: Geust lecturer
- Duration: 10/2020-10/2023

- **GEOL4355: Geophysical Field Camp**

- University of Houston
- Course level: Undergraduate course
- Class size: 15+
- Role: Teaching assistant
- Duration: 07/2019

Mentoring Experience

- **Abdelaziz Zine**

- PhD visiting student from Mohammed VI Polytechnic University (UM6P) to Stanford University
- Project title: Applied geometallurgy to strategic metals ore bodies for a resilient mine operation
- Co-supervisors: Abdellatif Elghali and Jef Caers
- Duration: 07/2024-present
- Student evaluation: Working under Dr. Xiaolong Wei's supervision at Stanford was transformative for my PhD journey. His deep insights into advanced methodologies like MCMC, level set methods, and simulation significantly enhanced my technical expertise. Beyond his academic guidance, Dr. Wei's mentorship was invaluable—he generously shared career advice, welcomed my questions, and provided unwavering support, which profoundly shaped both my academic and professional path.

- **Ziang Zhang**

- PhD student at University of Houston
- Project title: Transitional Markov chain Monte Carlo inversion
- Co-supervisors: Jiefu Chen
- Duration: 11/2024-present
- Student evaluation: Xiaolong demonstrates exceptional expertise in MCMC algorithms, providing clear explanations of complex concepts such as Markov Chains, Bayesian inference, and convergence diagnostics. He also provides patient guidance, and helps me grow fast in my first year PhD.
